Larviciding is the inspection and treatment of standing water where mosquito larvae may be found. This service is available to all member municipalities during the mosquito breeding season.

Tire Removal is for the removal of tires, reducing possible breeding locations. This service is available to residents in all member municipalities.

Adulticiding is spraying for adult mosquitoes by truck. This service is available in municipalities that have opted in to allow residents to request the service.

Adulticiding is typically available between Memorial day and mid-October.

4. Fill in the required information for the service selected. Required information designated by *

Larviciding
